ahead of the curve the good things about the common core learning standard ccls is that the name is all encompassing it may refer to the common core of what students want common core of what students are expected to know learn common core of knowledge in general the ccls is in this sense self explanatory what is difficult however is in aligning curricula with the ccls it is one thing to teach students about the importance of learning and or how to write a report or solve algebraic equations but it is quite another to teachers students to learn independently a teacher may teach or even explain concepts well to students but without facilitating students to develop interest in learning and to learn well independently the task is only half done aligning the curricula with the ccls and or explaining how learning tasks must be developed and built in order to help students to learn well is important this may be the most challenging aspect of teaching and this may be a main reason we maintain persistent educational problems the common core learning standard may be very valuable but according to authors of the ccls the federal and state education agencies and or representative do not pretend to know about local events and conditions they do not teach local agencies and or teachers how to teach in their local schools thus where curriculum publishers and local education representative cannot consider students interest they often use substandard criteria to align curriculum with ccls and we maintain persistent educational problems aligning curricula with the ccls requires a clear understanding of the motivations behind the ccls student learning becomes more efficient if teachers can develop and guide learning tasks in view of the requirements for success in the outside world in this monograph we explain the motivations behind the common core learning standard ccls we point to its limitations and introduce the reader to the instructional methods of goal and task teaching and learning gttl the gttl was developed over a course of twenty five years of research of interest by the founder of cdoil inc and we continue to refine the techniques the gttl complement the common core learning standard ccls in that its central focus is student interest gttl emphasizes the need to recognize student interest facilitate promote student learning and help them to develop increased interest in learning this monograph is divided into three sections section one we focus upon analyzing concepts of interest here we expound john dewey s 1934 definition of interest from the standpoint of the english language dictionary definition of interest and the definitions advanced by other writers

we attempt to expound the connections between student interest and the common core learning standard ccls and we categorize educators in accordance to the various beliefs views that educators have regarding student interest section two we expound an aspect of the common core learning standard that most educators rarely consider that is student interest as a core in the consideration and genesis of the ccls many educators do not consider student interest nevertheless we point out that student interest is vitally important that though the ccls is intended to curb substandard learning many student would still not learn well if teachers do not and cannot consider student interest section three we describe what should be the most appropriate methods of delivering instructions in view of student interest and of developing viable and efficient methods of helping students to learn well here we point out the connections between the ccls and the gttl methods we attempt to clarify what students think or do prior to and during learning tasks and how these affect what they do during and after learning to learn more about gttl at [cdoil.org/dr\\_martin\\_odudukudu\\_ceocdoil\\_inc](http://cdoil.org/dr_martin_odudukudu_ceocdoil_inc)
